

Marx – on Historical Conceptions of Hegel (1878)

By Karl Marx

- I. Hegel is about Spiritual Labour, he means just divine the study of labour and coinage and make a smattering of detailed studies out of it with pop cultural references, like dining customs

I mean make a materialist history, do not do Hegel and pop culture, do Marxism, a long manuscript on material categories and labour and labour studies. I also mean get into accounts, and even forms of labour, and labour process, and even lived accounts, and forms of wage.

“Study in meticulous analysis one’s life as working on labour studies, but of history, it will also have its highs, as a Prize or Award which then is also moving. I mean this is life well lived. I also mean imagine being rigourously at work each day. A lot of labour goes into writing a manuscript of 30 pages. I mean a lot of labour in Spirit.”
